The Arthur M. Blank Center for Entrepreneurship is the center for entrepreneurial activity at Babson. The Blank Center enhances the Babson experience by providing a true laboratory for entrepreneurship research and education, offering classrooms, meeting space with teleconferencing capabilities, a library, a cyber café, and the Founder’s Hall, a museum of entrepreneurial excellence.

The center focuses on expanding the practice of Entrepreneurship of All Kinds™ through innovative cocurricular programs and global collaborative research initiatives that inspire and inform Entrepreneurial Thought and Action®. Outside the classroom, students live entrepreneurship through the comprehensive John E. and Alice L. Butler Venture Accelerator Program, more than a dozen student-run entrepreneurship organizations and forums, and the Boston-area entrepreneurial ecosystem.

The Center for Women’s Entrepreneurial Leadership (CWEL) at Babson College educates, inspires, and empowers women entrepreneurial leaders to reach their full potential to create economic and social value for themselves, their organizations, and society.

The Center does this through innovative education programs, events, and by supporting and widely disseminating research about the unique skills and experiences of women entrepreneurial leaders. Additionally, CWEL supports and advances gender equality as a growth strategy for individuals and for organizations of all sizes, everywhere in the world. CWEL is integrated in the graduate student experience through programs that support development of mentor and network relationships, provide financial support to attend important women’s leadership events, and deliver impactful learning opportunities that meet students’ leadership development needs at this critical stage of their careers.
THE LEWIS INSTITUTE

The Lewis Institute illuminates a path for students, faculty, and corporate partners seeking entry into the field of social innovation. By drawing upon Babson’s core competencies, methodologies, and commitment to creating economic and social value everywhere, the institute helps create unexpected yet fruitful collaborations and design knowledge tools that result in business prosperity and societal improvement.

Led by the Lewis Institute, the Babson Social Innovation Lab puts those ideas from diverse minds into action. New concepts in social innovation are prototyped, evaluated, and proved in real-world contexts. Funded by a two-year, $500,000 grant from the Toyota Foundation, the Babson Social Innovation Lab brings together a global, interdisciplinary community of students and mentors dedicated to building a better world.

STEPHEN D. CUTLER CENTER FOR INVESTMENTS AND FINANCE

The Stephen D. Cutler Center for Investments and Finance is dedicated to advancing the understanding and practice of investments and finance in our global economy. The center provides programs and resources that enrich student experience, support faculty research, and engage our alumni community. It is committed to furthering Babson’s innovative and practical approach to finance education and enabling industry practitioners, faculty, and students to collaborate and learn from one another.

Graduate students may apply to The Babson College Fund (BCF). BCF is an academic program in which specially selected students from both the Undergraduate and Graduate schools manage a portion of the Babson College endowment. The program builds students’ investment research and portfolio management skills, and offers practical experience.

FOR MORE INFORMATION on how these centers enhance the Babson experience, we invite you to contact Graduate Admissions at gradadmissions@babson.edu or 1-800-488-4512.
