

At Babson, we are committed to integrating social and environmental sustainability concepts into the education of the world's next generation of business leaders. In addition, we are an innovative sustainability leader informing, engaging and exciting our students, staff, and faculty around sustainability as a community value. Therefore, we seek to attract and retain employees who are aligned with these values. Specifically, those who can demonstrate consistency in sustainability practices in the workplace including resource usage, recycling actions and waste reduction. We seek individuals who will acquire knowledge regarding the impacts of our behaviors in the environment and who will maintain their sustainability citizenship within the Babson community.
